KRISTIYAN HRISTOV

C# FULL-STACK DEVELOPER

EDUCATION

Software University

Sofia, Bulgaria

Software Engineering

- C# Programming Basics** - Introduction to programming, data types, conditionals (if-else), and loops.
- C# Programming Fundamentals** - Developed proficiency in fundamental concepts including arrays, lists, methods, associative arrays, text processing, regular expressions, and version control with Git.
- C# Advanced** - Delved into topics like exception handling, collections, streams, functional programming, and generics.
- C# OOP** - Acquired expertise in OOP principles and learned unit testing, SOLID principles, and design patterns.
- MS SQL** - Gained understanding of relational databases, writing queries in SQL Server, and performing CRUD operations with functions, procedures, and transactions.
- C# Entity Framework Core** - Mastered the leading ORM library in C#, EF Core, using both Code-First and Database-First approaches to build various applications.
- HTML & CSS** - Developed skills in structuring HTML documents, utilizing various tags, and styling documents using CSS.
- JS Front-End** - Built dynamic websites using JavaScript, including AJAX calls, DOM manipulation, and interactive functionality.
- ASP.NET Fundamentals** - Introduction to ASP.NET Core.
- ASP.NET Advanced** - Mastery of ASP.NET Core, building MVC and Web API applications.
- ReactJS** - Developed proficiency in component-based architecture, state management, hooks, and building dynamic single-page applications.
- Software Engineering and DevOps** - Learned SDLC principles, version control, and CI/CD practices for automation and collaboration.
- Containers and Cloud** - Worked with Docker for containerization and explored cloud deployment for scalable applications.

Bachelor's degree at St. St. Cyril and Methodius

Veliko Tarnovo,

Bulgaria

Software Engineering

10/2023 - Present

PROJECTS

Music App

2025

- (Preview)** This is a ReactJS application for music that allows users to register and listen to music.

Ocean Pure

2024

- (Preview)** Landing page built with ReactJS and TailwindCSS that is fully responsive and follows best UI/UX design principles.

Social Media ASP.NET Core

2024

- (Preview)** A Social Media platform built with ASP.NET Core (MVC and Web API) that replicates key features of modern social media applications.

Portfolio

2024

- (Preview)** This website's purpose is to showcase my skills and expertise as a software engineer.
